Leasing available please contact us for more information.

A heavy-duty, single animal scale that lets you keep accurate records for weigh-in, weigh-out, performance testing, etc. Available as stationary scale or portable unit with hydraulic jack for raising and lowering transport wheels. Scale platform is 8 feet long. Four electronic load cells - one on each corner - insure precise weights. Same type of scale used with feed wagons and weigh wagons.

The **Bowman Portable Electronic Scale** is designed and built for life-time operation... takes rough roads, pasture trails, cattle jumping up and down... without the kind of wear standard knife or cable suspension scale systems show after hard use. The electronic load cells are moisture resistant for positive operation under adverse weather conditions. Scale actually will weigh up to 30,000 lbs.

Dealerships available in some areas.
